MEMORANDUM FOR THE RECORD

SUBJECT: Installation of Current at the Record Center

1. The undersigned called [] at the Record Center last week regarding installation of electricity onto the loading platform at the Record Center Building. This current is necessary to operate the electrical motor that will be provided with the new air-fed incinerator.

25X1

2. The current necessary is 220 volt, 50 cycle, 3 phase electricity. It should be installed along the wall about half or three-quarters of the way down from the ceiling near the extending wall. [] said this can be accomplished without trouble.
